

Classifying the *Iberian lynx*

KINGDOM: Animals

The animal kingdom includes several phyla. Animals which are as different as the Iberian lynx and the butterfly belong to the same kingdom.

GROUP : Vertebrates

The Vertebrates are divided into several classes (as in the picture), amphibians, reptiles, birds and mammals.

KINGDOM: Animals

The animal kingdom includes several phyla. Animals which are as different as the Iberian lynx and the butterfly belong to the same kingdom.

CLASS: Mammals

The mammal class includes several orders: carnivores, rodents (the squirrel belongs to this order).

PHYLUM: Chordates

The phylum chordates is divided into several classes (as in the picture), amphibians, reptiles, birds and mammals.

KINGDOM: Animals

The animal kingdom includes several phyla. Animals which are as different as the Iberian lynx and the butterfly belong to the same kingdom.

ORDER: Carnivores

The carnivore order includes several families: felids, canids (the wolf belongs to this family).

CLASS: Mammals

The mammal class includes several orders: carnivores, rodents (the squirrel belongs to this order).

PHYLUM: Chordates

FAMILY: Felids

The felid family includes genus Lynx and other felids (the cat belongs to this family).

ORDER: Carnivores

The carnivore order includes several families: felids, canids (the wolf belongs to this family).

CLASS: Mammals

The mammal class includes several orders: carnivores, rodents (the squirrel belongs to this order).

PHYLUM: Chordates

GENUS: Lynx

The genus Lynx is formed by several species. The Iberian lynx is grouped together with the European lynx in the same genus.

FAMILY: Felids

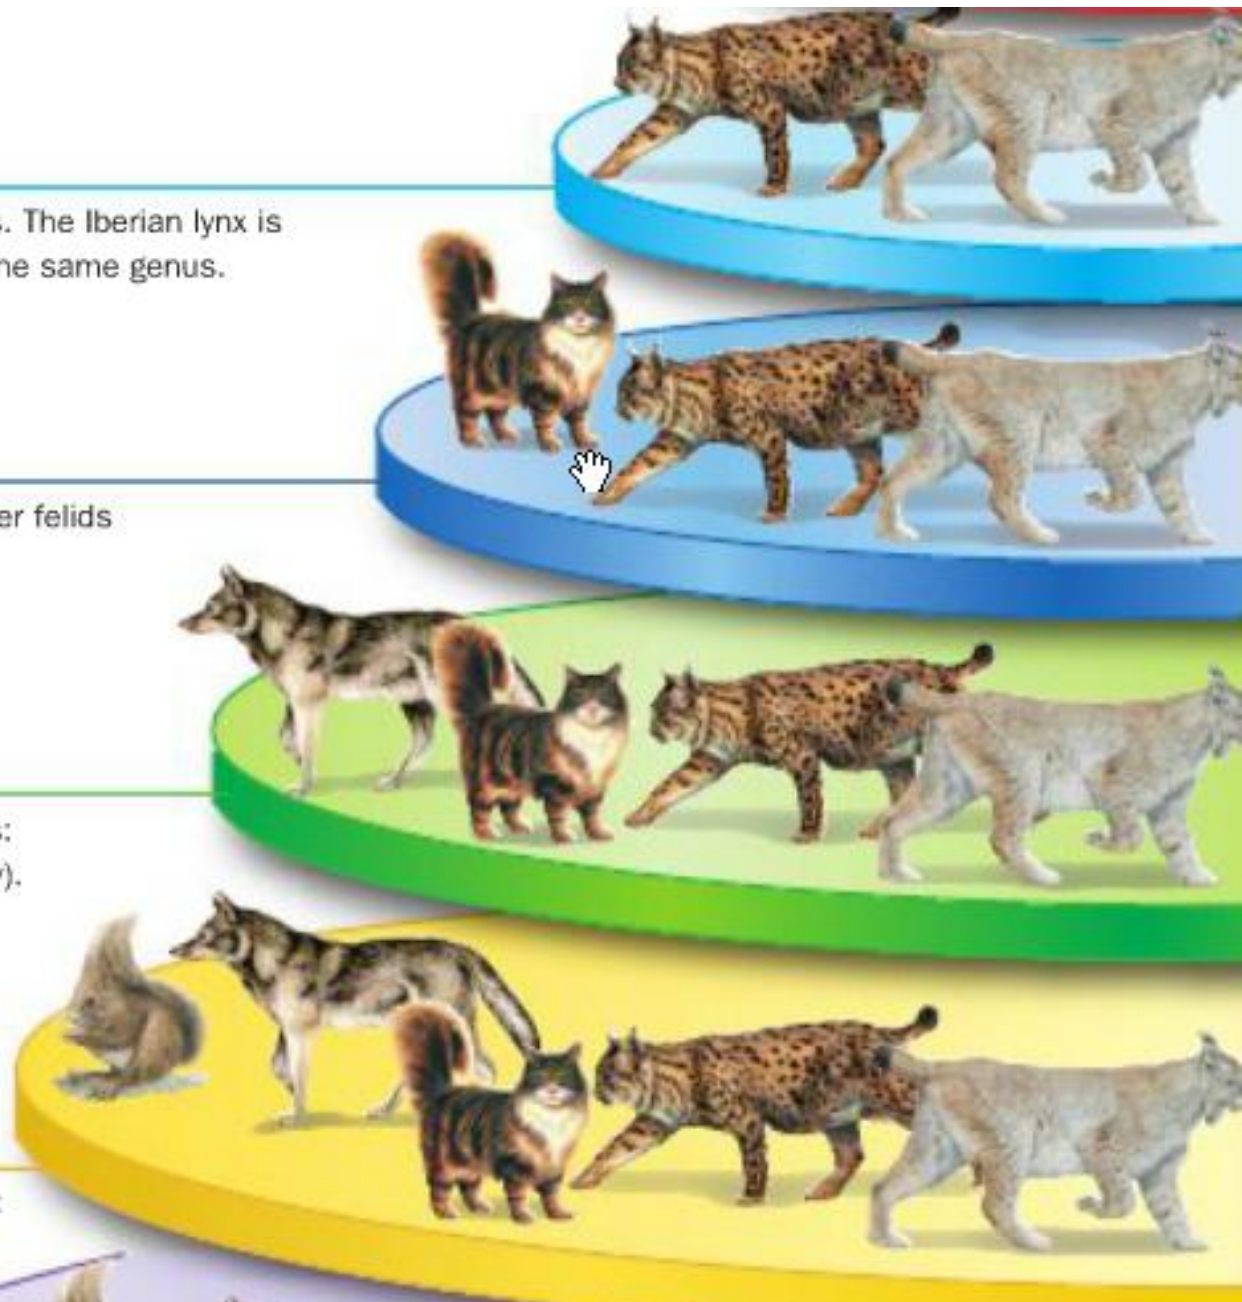

The felid family includes genus Lynx and other felids (the cat belongs to this family).

ORDER: Carnivores

The carnivore order includes several families: felids, canids (the wolf belongs to this family).

CLASS: Mammals

The mammal class includes several orders: carnivores, rodents (the squirrel belongs to this order).

SPECIES: *Lynx pardinus* (Iberian lynx)

These two living beings have very similar characteristics and they belong to the same species.

GENUS: Lynx

The genus Lynx is formed by several species. The Iberian lynx is grouped together with the European lynx in the same genus.

FAMILY: Felids

The felid family includes genus Lynx and other felids (the cat belongs to this family).

ORDER: Carnivores

The carnivore order includes several families: felids, canids (the wolf belongs to this family).

Classifying the Iberian lynx

SPECIES: *Lynx baileyi* (Iberian lynx)

These two living beings have very similar characteristics and they belong to the same species.

GENUS: *Lynx*

The genus *Lynx* is formed by several species. The Iberian lynx is grouped together with the European lynx in the same genus.

FAMILY: Felidae

The feline family includes genus *Lynx* and other felines (the cat belongs to this family).

ORDER: Carnivora

The carnivore order includes several families: felids, canids (the wolf belongs to this family).

CLASS: Mammalia

The mammal class includes several orders: carnivores, rodents (the squirrel belongs to this order).

PHYLUM: Chordata

The phylum chordata is divided into several classes (as in the picture), amphibians, reptiles, birds and mammals.

DOMAIN: Animalia

The animal kingdom includes several phyla. Animals which are as different as the Iberian lynx and the butterfly belong to the same kingdom.
